Contents of Volume 18

No. 1

Research Papers

J. Díez, M. Hofner, E. Domingo and A.I. Donaldson (U.K., Spain)
Foot-and-mouth disease virus strains isolated from persistently infected cell cultures are attenuated for mice and cattle 3

L. Dirckx, D. Lindemann, R. Ette, C. Manzoni, D. Moritz and J. Mous (Switzerland)
Mutation of conserved *N*-glycosylation sites around the CD4-binding site of human immunodeficiency virus type 1 GP120 affects viral infectivity 9

M.J. Grubman (U.S.A.)
Expression of bluetongue virus serotype 17 NS1 protein from a cloned gene 21

P. Portincasa, G. Conti and C. Chezzi (Italy)
Abortive replication of influenza A viruses in HeLa 229 cells 29

M.A. Johnson and J.M. Whalley (Australia)
Structure and physical map of the genome of parma wallaby herpesvirus 41

R.J. Colinas, R.C. Condit and E. Paoletti (U.S.A.)
Extrachromosomal recombination in vaccinia-infected cells requires a functional DNA polymerase participating at a level other than DNA replication 49

P. Britton and K.W. Page (U.K.)
Sequence of the S gene from a virulent British field isolate of transmissible gastroenteritis virus 71

A. Hirsch-Behnam, H. Delius and E.-M. De Villiers (F.R.G.)
A comparative sequence analysis of two human papillomavirus (HPV) types 2a and 57 81

No. 2

Research Papers

S. Takase-Yoden, T. Kikuchi, S.G. Siddell and F. Taguchi (Japan, F.R.G.)
Localization of major neutralizing epitopes on the S1 polypeptide of the murine coronavirus peplomer glycoprotein 99

R.R. Yalamanchili, B. Raengsakulrach and D.J. O'Callaghan (U.S.A.)
Equine herpesvirus 1 sequence near the left terminus codes for two open reading frames 109

H. Baylac-Kalabokias, T. Astier-Gin, D. Moynet, M. Hernould, R. Mamoun, E. Legrand and B. Guillemain (France)
A new leukemogenic retrovirus isolated from tumor cells derived from a radio-induced lymphoma of C57BL/6 mice: analysis of the *env* and LTR sequences 117

M. Tognon, R. Guandalini, M.G. Romanelli, R. Manservigi and B. Trevisani (Italy)
Phenotypic and genotypic characterization of locus Syn 5 in herpes simplex virus 1 135

J.C.S. Clegg, S.M. Wilson and J.D. Oram (U.K.)
Nucleotide sequence of the S RNA of Lassa virus (Nigerian strain) and comparative analysis of arenavirus gene products 151

J.C. Martyn, A.R. Gould and B.T. Eaton (Australia)
High level expression of the major core protein VP7 and the non-structural protein NS3 of bluetongue virus in yeast: use of expressed VP7 as a diagnostic, group-reactive antigen in a blocking ELISA 165

L. Hirt, A. Hirsch-Behnam and E.-M. De Villiers (F.R.G.)
Nucleotide sequence of human papillomavirus (HPV) type 41: an unusual HPV type without a typical E2 binding site consensus sequence 179

H. Isomura, M. Shinagawa, Y. Ikegami, K. Sasaki and N. Ishiguro (Japan)
Morphological and biochemical evidence that scrapie-associated fibrils are derived from aggregated amyloid-like filaments 191

D.J. Pulford and P. Britton (U.K.)
Expression and cellular localisation of porcine transmissible gastroenteritis virus N and M proteins by recombinant vaccinia viruses 203

L.H. Nel, L.A. Picard and H. Huismans (South Africa)
A characterization of the nonstructural protein from which the virus-specified tubules in epizootic haemorrhagic disease virus-infected cells are composed 219

H.G. Morrison, C.S. Goldsmith, H.L. Regnery and D.D. Auperin (U.S.A.)
Simultaneous expression of the Lassa virus N and GPC genes from a single recombinant vaccinia virus 231

S.P. Tucker, C.R. Penn and J.W. McCauley (U.K.)
Characterisation of the influenza virus associated protein kinase and its resemblance to casein kinase II 243

P. Chambers, D.A. Matthews, C.R. Pringle and A.J. Easton (U.K.)
The nucleotide sequences of intergenic regions between nine genes of pneumonia virus of mice establish the physical order of these genes in the viral genome 263

M. Wittels and P.G. Spear (U.S.A.)
Penetration of cells by herpes simplex virus does not require a low pH-dependent endocytic pathway 271

P.R. Post, R. Carvalho and R. Galler (Brazil)
Glycosylation and secretion of yellow fever virus nonstructural protein NS1 291
